

FINTIN V1

FINTIN.CO.KR

THE MOST ACCESSIBLE
MINI QWERTY-COMMUNICATOR

FINTIN

A new QWERTY communicator that provides easy access to XR, smart TV, console game devices, AI, social media, etc.

Structured Mini QWERTY Tech

FINTIN V1 is a next-generation input device, featuring 'Structured Mini QWERTY' technology.

This technology allows for the input of up to 36 QWERTY keys using just 6 keys. Each key is designed for tactile recognition, allowing users to type quickly and accurately in any environment without having to look at the keys.

Optimized for the visually impaired

FINTIN V1 helps the visually impaired as well as able people easily access the modern digital environment and enjoy independent lives. It also provides opportunities for visually impaired people to use social media more conveniently and to develop their potential in various fields.

Real-time communication on digital platforms

FINTIN has completely solved the difficulties of fast and accurate real-time communication that have not been solved for a long time in XR, smart TVs, console gaming devices, AI, and social media. Anyone can communicate easily and quickly now.
